

*Trim Winder*

Our initiative as a serving partner to you is to introduce new & Innovative concepts for designing & performing your process differently than the conventional one.

In today's competitive market every one is aiming at the savings because "savings is the direct earning".

We have emphasized this truth and positioned ourselves as a solution provider to the Industry with savings at maximum possible routine processes.

In this regard we have introduced some different concepts in "Printing & post printing process".

Trim Winder is an innovative concept which adds value to the process by rewinding the trim produced by converting machines. Like Slitting, Extrusion, Pouch Making and many more....

**FEATURES :**

- Required minimum space
- Low Power consumption
- Noiseless device
- Effective Trim Storage

**OPTIONAL :**

- Turret Rewinding
- Core Less Rewinding
